

LivingWALL PLUS

VENTILATED RAINSCREEN FACADE GREENING

As a ventilated rainscreen façade greening system, LivingWALL PLUS is delivered modularly pre-assembled. Pre-sewn fleece modules replace the previous on-site processing and significantly simplify handling during installation, resulting in a noticeably more efficient construction process. At the same time, the system is highly flexible and individually adaptable to virtually any geometry. LivingWALL PLUS meets fire classification A2.

PRODUCT FEATURES

- Ventilated rainscreen façade greening
- Pre-sewn fleece module

PRODUCT ADVANTAGES

- Individually adaptable to virtually any geometry
- Delivered modularly pre-assembled on PRO+ aluminium substructure
- Unlimited structural height
- Pre-cultivated young plants in Vertiko substrate

PRODUKT SPEZIFIKATIONEN

Size of sewn module:	1600 x 535 (Width x Height)
Modularity:	Width-adjustable in 200 mm increments
Dry weight:	max. < 23 kg/m ² (excl. plants)
Water-saturated weight:	max. < 30 kg/m ²
Number of plants per module:	24 (= 28 plants pro m ²)
Plant pocket size:	200 x 150 mm (Width x Height)
Certificates:	Fire classification A2 s1-d0 to DIN EN 13501-1
